Laser Cutting Machine

CNC Press Brake

Hydraulic Shearing Machine

25HP Air Compressor

Hot Press Machine

Hydraulic Cold Press

PUF Machine

Powder Spraying

Thickness Planer

Panel Saw Wood Cutting Machine

Oscillation Mortiser

Round End Tenoner

Automated Conveyerised Powder Coating Plant

Panels

Inter Locking

Tongue-and-groove system for efficient and tight locking of panels with each other.

PUF Insulations

Using Poly Urethane Foam as an insulating material, keeps the building temperature relatively unaffected from the outside weather.

PUF Heat Insulation :
Max 0.021 W/mk
PUF Sound Insulation : 45Db
EPS, Rockwool Also Available for Insulation

Exterior Cladding

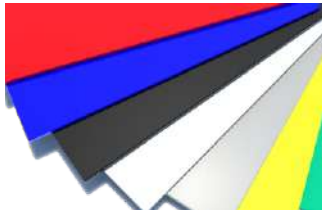

Decorative cladding of any kind can be used to make your building more appealing.

Interior Cladding

Choose from an endless choice of luxurious options for the perfect finish.

Advantages of Façade Applications

Exterior Cladding

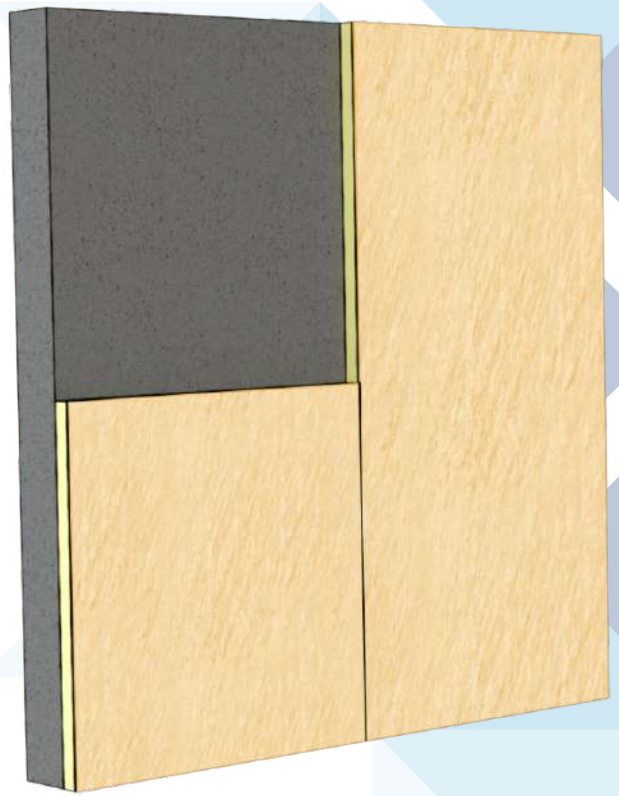

Any kind of material option can be provided for the cladding as per your design requirement.

Roof Panels

These panels along with roof shingles or any other material of your choice can be used for Roofing and insulating too.

Reduce Building Cooling Costs

Using PUF as the base stops the building's dead walls from absorbing outside heat, keeping the building relatively cool.

Advantages Prefabricated Building Applications

Insulation

PUF insulation make sure that the panels are 100% water tight, as well as allow any electrical wiring or plumbing to be pre installed.

Wiring

Pre-Installed Wiring allows for Faster installation of the prefab building, reduces finishing work, and avoids the hassle of running covers for wiring.

Load Bearing

The frame locks the whole panel together and allows it to be directly used as the load bearing wall of the prefabricated building.

Plumbing

We can pre install plumbing in the panels, that allows the panels to be used as toilet blocks and walls, reducing the need for masons and plumbers at the site.
